

THE MONITOR NEWS

VOL. 5

MONITOR, ALBERTA, FRIDAY, APRIL 2nd 1920.

NO. 15

SPRING

You need a good tonic, don't you think so after the winter we have just gone through. Try a bottle of Nyallo Spring Tonic or Hypophosphites and feel difference. I can name you dozens of farmers who are using Stock Food and conditional powders with remarkable success this spring. If you have no purchased a full on package, get one at the Drug Store, and if you are not satisfied with the results, I will refund you your money.

Fresh Formaldehyde at 60c per lb. This is Batons price net Winnipeg and our price f. o. b. Monitor. Surely after wintering your calves and yearlings you will not run the chance of losing them with blackleg. Use Cutters Pills—10 doses for \$1.00

Which are you going to do, kill the gophers or sow about 24 bushels of wheat to the acre? You should do one or the other and be sure of a crop. We have a full line of Gopher poisons and Strychnine.

Fancy Chocolates, Good Stationery, Kumaks, fresh shipment of Films, Magazines, etc., etc., Get them at the Kennedy Drug Store. We need the business. Drop in any time—you are always welcome.

THE KENNEDY DRUG COMPANY

ALERT ALTAR

"The Host Yac" was the verdict of the large audience on Friday last, March 26th at the Concert held in the School. It is impossible to mention each item of the long program, suffice it to say the artists, little and big, acquitted themselves in a most noteworthy manner. One of the most charming numbers was the "Lullaby Land" a character chorus by the tiny tots. George Conquest made his first public appearance in the song "When you come home" and was heartily encouraged. His reply was "The Hoodlum Girl" to Mrs. J. D. Robinson and Miss Inlander the thanks of the community are due for the excellent work accomplished in training the children. We hear \$37.00 was raised for the hospital.

The report of the W. I. delegate will be given at the next meeting at Mrs. Watlings.

Arrows are still being shot forth in Alert Altario. Oh Cupid, Cupid, we hear you have hit the bulls eye no fewer than 6 times here, and wedding bells will be kept ringing for months to come—heros luck to Johanna and Martin, the first couple to take the plunge.

We hope everyone will book the date, April 3rd, for the School Fair Meeting at Altario schoolhouse, and come prepared to take part in the discussions of the pros and cons of the business. Women are urged to attend as their interest and advice will be valued.

We wish our readers a happy Easter tide.

Do not forget to file your

Income Tax Return

on or before the 30th of April, 1920

Dominion of Canada

Department of Finance

ALL persons residing in Canada, employed in Canada, or carrying on business in Canada, are liable to a tax on income, as follows:—

1. Every unmarried person, or widow, or widower, without dependants as defined by the Act, who during the calendar year 1919 received or earned \$1,000 or more.
2. All other individuals who during the calendar year 1919 received or earned \$2,000 or more.
3. Every corporation and joint stock company whose profits exceeded \$2,000 during the fiscal year ended in 1919.

Forms to be used in filing returns on or before the 30th of April, 1920.

ALL INDIVIDUALS other than farmers and ranchers must use Form T 1.

FARMERS AND RANCHERS must use Form T 1A.

CORPORATIONS and joint stock companies must use Form T 2.

Penalty

Every person required to make a return, who fails to do so within the time fixed, shall be subject to a penalty of Twenty Dollars per centum of the amount of the tax payable.

Any person, whether taxable or otherwise, who fails to make a return or provide information duly required according to the provision of the Act, shall be liable on summary conviction to a penalty of \$100 for each day during which the default continues. Also any person making a false statement in any return or in any information required by the Minister, shall be liable on summary conviction, to a penalty not exceeding \$10,000, or to six months imprisonment, or to both fine and imprisonment.

2

Address INSPECTOR OF TAXATION, CALGARY, ALTA.

R. W. BREADNER, Commissioner of Taxation.

Local Happenings

Sounding Lake U. F. A. general meeting 1st Saturday in each month 8 p.m. at Horse Shoe Schoolhouse.

Mr. G. W. Mullen and family returned from the U. S. A. on Friday of last week.

The Ladies Aid meet at the home of Mr. and Mrs. J. L. Wright on the 7th of April.

FOR SALE. Pure-bred Barred Rock, bred-to-lay Strain, EGGS for hatching. \$1.25 per setting. Apply to A. Grace, Monitor Alta. 15 t t.

NOTICE

A meeting of every person interested in Tennis is called for the evening of Friday, April 9th 1920, in the G. W. V. A. public Rest Room. Ladies as well as gentlemen are requested to attend. It is the intention to re-organise the Club, elect officers, and draft by-laws and Constitution governing the play upon the courts. Various other matters will be brought up for discussion and a fully represented meeting is asked for. If you have any suggestions, grievances or wishes to make known, please come prepared to air them at this meeting. Friday, April 9th, in the G. W. V. A. Rest Room.

Judging by the weather we have been experiencing for the last week or so, this is an exceptionally early winter.

Your attention is drawn to the provisions etc. of the Income Tax advertisement appearing in this and last weeks issue.

Mrs. J. Bergman left on Thursday for Tisdale, Sask. to attend her mother, who is very ill.

Mr. Wm. Kline, of New Bridgen, returned to Monitor on Saturday last from Ontario, where he had been spending the winter, and incidentally his honeymoon, for on his return he was accompanied by his wife whom he married at Formosa Ont., last January. Congratulations of the district are extended to the happy couple.

Mr. Harry Shannon returned to town last week from Noral, Alta.

Mr. Dora Childress returned from the States on Saturday last.

A CONCERT and SUPPER

has been arranged by the MONITOR LADIES AID to take place on

Mon. April 5th

SUPPER from 5 to 7 p.m. in the G.W.V.A. Rest Room 50c.

CONCERT at 8 p.m. in the Big Hall. Admission 50c.

Proceeds in aid of the Building Fund of the New Church

THE WILKIE STUDIO, Wilkie, Sask. Or bring or send your Films to the NEWS office with full instructions.

As anticipated, the service rendered by the Wilkie Studio is giving vast satisfaction to the photographers of the district. Drop in at the News office and see a few samples for yourself.

Mr. A. J. Dendmarsh went to Saskatoon on business on Tuesday.

Mr. Joe Lehman arrived in Monitor on Saturday last from Ontario. He expects to locate in the west and in the meantime will work for Billy Kline.

March surely lived up to her reputation of "going out like a lion" on Wednesday. The worst of it is that it came in like a lion too, and during the month has behaved like a blooming mangier.

Mr. Dora Childress is making arrangements to have a Big Auction Sale in the near future. Watch these columns and posters for dates and particulars.

Mr. Frank O'Connor, of Provost, one of the pioneers of this district, was in town on Tuesday of this week.

ABOUT YOUR CHILBLAINS!

What are they? A mild form of frost-bite—a chilling of the part to such a degree that inflammation is set up, causing a tingling pain, excessive irritation and often swelling. Zam-Buk cures chilblains by drawing out the inflammation, thus ending the pain and irritation and reducing the swelling.

Miss Annie Lepard of Beaverdale, Ont., says: "I suffered agonies from chilblains and used many remedies, but nothing gave me any ease until I used Zam-Buk, which, after a little perseverance, completely rid me of this painful ailment."

Regular applications of Zam-Buk will prevent a recurrence of the trouble. Keep it handy. 50c. box.

Zam-Buk

Canada's Status

Canada's international status has been determined by its inclusion in the League of Nations as a distinct national entity, possessing the same standing and voting power as is accorded to sovereign nations, and obligated to assume the same responsibilities and discharge the same duties as are laid on all other nations.

This is an almost revolutionary change in status to that existing prior to the Great War. When, on August 4, 1914, Great Britain declared war on Germany, Canada, in common with the whole British Empire, was automatically at war. The Canadian Parliament did not make a declaration of war; it merely took official cognizance of the fact that a state of war existed. It remained, however, for the Canadian Parliament to decide the extent of Canada's participation in the war.

In future, however, as a full-fledged member of the League of Nations, Canada will have a voice in deciding issues of peace or war. Canada's vote will count just as effectively as the vote of Great Britain, France, Italy or any other country. This means that, whereas formerly Canada had no foreign policy, because it had no say in foreign affairs. It must decide issues of peace or war for itself.

This change in Canada's international status inevitably calls for some change in its position within the British Empire and in the relations hitherto existing between this Dominion and Great Britain. There are certain anomalies in the present relationship that must be corrected, but which in no wise weaken the Empire, or tend to Canada's withdrawal therefrom; on the contrary, such changes as are necessary should have the effect of adding strength to the Empire.

Recognized as a nation within a

League of Nations, Canada will have direct relations with all other nations and it is almost certain to follow that this Dominion will have its own accredited representatives at the capitals of other countries. The first step in the evolution of this policy is being taken in the appointment of a Canadian Minister to Washington. In the past, if the Canadian Government had representations to make to the United States Government it was necessary to transmit them to the Colonial Office in London, who in turn handed them over to the British foreign office, which sent them on with instructions to the British ambassador or at Washington. Replies to such representations had to return via the same route, and all negotiations between Ottawa and Washington had to be conducted through London. In future, we are to have direct dealings with the United States Government through a Canadian Minister at Washington.

Other important constitutional changes are up for discussion at Ottawa. Canada derives its constitution from the British Parliament, through the British North America Act. Any alteration or amendment to that constitution can only be effected by the British Parliament upon address of the Canadian Parliament. It is now proposed that Canada shall be given full power over its own constitution, to amend it from time to time as the people of Canada conceive in their own interest it should be amended and without recourse to the British Parliament. Australia and New Zealand possess such control over their constitution, and the Dominion Minister of Justice is now in negotiation with the several Provincial Governments with a view to having representations made to the British Government and Parliament for the conferring of similar powers upon Canada.

The view has long been held by many Canadians that a change should also be effected in our system of judicial appeals. At present the final court of appeal for Canada is the Judicial Committee of the Privy Council in England. There is a growing belief that, so far as Canadian cases are concerned, the Supreme Court of Canada should be made the final court of appeal—that it should be supreme in fact as well as in name, and that all the expense and delay inseparable from appeals to London should be obviated.

Slowly, but none the less surely, Canada and the other self-governing Dominions of the British Empire seem to be moving towards the ultimate goal of independence in all foreign affairs, just as they have long been independent in all domestic matters. This does not mean that Canada will sever its connection with Britain, nor withdraw from the Empire. Not at all. It has been declared by the Prince of Wales, Lloyd George and others, that Canada is now a nation, a partner of Great Britain, occupying a position of equality with Britain in the Empire. If this is true, and no one disputes it, then existing anomalies whereby in some respects the British Government, Parliament and the courts can exercise a veto over Canada must be removed.

Evolving gradually, the apparent end would seem to be the constitutional establishment of Canada and the other self-governing Dominions as sovereign nations, all owing allegiance to one Crown, flying the same flag, working together in cordial co-operation for the good of all, but each mistress of their own affairs. In a word, a league of British nations within a League of Nations.

Alberta Potatoes for California

Recognition of Quality of Produce Grown in Western Canada

New markets for the potato crop of Alberta have been opened up by the shipment of a whole carload of potatoes consigned from Edmonton to San Francisco.

This shipment practically constitutes the first consignment of the kind ever sent from Edmonton direct to the Pacific Coast. While eastern markets have been plentiful in the past, direct orders for potatoes from California points have seldom reached this city and the placing of such a shipment with a city such as San Francisco is a recognition of the quality of produce grown in the province.

A SPRING TONIC AIDS EFFICIENCY

Lay Foundation of Good Health Now By Building Your Blood and Strengthening Your Nerves

The good old fashion of taking a tonic in the springtime, like most of the customs of our grandparents, is based upon sound common sense and good medical practice. Winter is always a trying time, for those who are not in rugged physical health. Many men, women and children go through the winter on reserve strength they have stored up during the sunny, summer months, and grow increasingly pale and languid as the spring days approach. A tonic for the blood and nerves at this time will do much for such people, by putting color in the cheeks and banishing that tired feeling that worries thousands of people at this season of the year.

It is impossible to be energetic if your blood is thin and weak, or if your nerves are frayed or shattered. You cannot compete with others if you do not get refreshing sleep at night, or if your appetite is poor or you are losing weight. You need a tonic at this time to add to your efficiency now, as well as to save you from suffering later on. And in all the realm of medicine there is no better tonic than Dr. Williams' Pink Pills. These pills tone and enrich the blood which circulates through every portion of the body, strengthening that tired feeling and run-down organs, and bringing a feeling of new strength and energy to weak, easily tired, despondent men, women and children.

Mrs. J. N. McNeil, Glace Bay, N.S., says: "For years past my home has never been without Dr. Williams' Pink Pills, and I have good reason to prize them highly. Following an attack of the grippe, I was left in a badly run-down condition. I had no appetite and felt so weak I could scarcely go about the house. I was taking medicine but it was not helping me, and a friend advised me to try Dr. Williams' Pink Pills. I used them for a time with the most beneficial results. My appetite improved, my strength returned and I was soon able to do all my household work. I now use the pills every spring and find them a splendid strength bringing tonic. I have recommended the pills to other friends who have used them with good results."

Dr. Williams' Pink Pills are a tonic, not a stimulant. They build up the blood, and through their use not only the disastrous effects of influenza but also troubles due to poor blood such as anæmia, rheumatism, indigestion and the generally worn-out feeling that so many people associate with the winter season disappear. You can get these pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

Lumber Shortage in Alberta

Needs of Western Canada Should Be Considered First

Curtailed amount of the amount of lumber exported from Canada is the request which the Alberta Association of Architects has put before the federal government. Local architects assert that the situation is desperate if the big building program in sight for the coming season is to be carried out. The association urges that the needs of Western Canada should be considered first and the exportation of lumber to the United States prohibited or curtailed until such time as there is an adequate supply of lumber for future building undertakings in Canada.

Many a train of thought carries no freight.

Some men even like to brag about what they owe.

Minard's Liniment Relieves Neuralgia

The Right Course

Work of Instructing British Columbia's Farmers of Tomorrow

Agriculture under competent teachers along practical lines is taking an increasingly important position in the curriculum of the public schools in the different municipalities of the lower Fraser Valley of British Columbia.

At the present time the class in agriculture of one of the high schools are taking a course in the proper feeding of live stock and are getting an insight into the different values of the various kinds of feeds for cattle, horses and sheep.

Last month the pupils were gaining useful knowledge about soils, their properties and fertilization. Ten schools in the same district are busy preparing plans for the school gardens. Poultry raising and the care of calves and pigs are also on the school program.

The teaching of nature-study in the class-rooms, the practical work of the school and home garden, and the emulating contests of school fairs are all factors which tend towards the development of the boys and girls of today, and will greatly assist them in becoming efficient farmers and farmer's wives in the coming years.

Minard's Liniment Cures Dandruff.

Canada's Tire Production

Figures made public in Montreal show that there were about 2,000,000 automobile tires manufactured in Canada last year, requiring about 8,000,000 square yards, or 12,000,000 to 16,000,000 pounds of tire fabric, and that only about one third of the fabric required in the manufacture of these tires was made in Canada. The remainder came from the United States. Increased production of tire fabric is now aimed at.

Lift off Corns!

Doesn't hurt a bit and Freezone costs only a few cents.

With your fingers! You can lift off any hard corn, soft corn, or corn between the toes, and the hard skin calluses from bottom of feet. A tiny bottle of "Freezone" costs little at any drug store; apply a few drops upon the corn or callus. Instantly it stops hurting, then shortly you lift that bothersome corn or callus right off, root and all, without one bit of pain or soreness. Truly! No humbug!

Death was the penalty for over 200 offences in England at the start of the 19th century.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

The name "Bayer" identifies the only genuine Aspirin—the Aspirin prescribed by physicians for over nine years and now made in Canada. Always buy an unbroken package of "Bayer Tablets of Aspirin" which contains 10 tablets each. There is only one Aspirin—"Bayer"—you must say "Bayer". Aspirin is the trade mark (registered in Canada) of Bayer Manufacturing of Monach, manufacturer of Salicylic acid. While it is well known that Aspirin means Bayer Manufacturing, to avoid the public apathy, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross".

BOY SCOUT NEWS

Boys of the Two Uplifted Fingers

Scout Movement Is the World-Wide Brotherhood of Boys

The year of 1912 was conspicuous in that there was officially originated in England the Boy Scout movement, which since that time has spread throughout the Empire and into most of the countries of the world, until today it can with truth be said of the Boy Scout movement that it is the world-wide brotherhood of boys.

The movement had originated a few years prior to this date, and before the Royal Charter of incorporation was issued there were troops in existence in various parts of the empire. During the initial years of the movement, each and every Scoutmaster was confronted with the problems of what to do with the junior boy, that boy that was too young to become a Scout, that boy that persisted in his demand to be allowed to enter this world-wide brotherhood of boys.

It was not until 1914 that the great chief in this world-wide brotherhood launched his answer to the demand of the junior boy and submitted to the world the Wolf Cub programme in the same quiet and masterful way that he had submitted the Boy Scout programme to it six or seven years previous.

"Give us the young," says Benjamin Kidd, "and we will create a new mind and a new earth in a single generation." There is no objective which a people or race can set before itself which is not possible through the organization and transmission of an ideal in its social heredity.

Up until this time no programme had taken account of the younger boy in any real constructive way, for it was only beginning to be realized that the young people must be the first line in everything that concerns future regeneration and reconstruction. No programme is constructive or worth the paper it is written on that does not take into account the young people. In providing for future navies and fortifications for the world must not neglect to provide for those invisible fortifications of the soul which mean more to a nation's strength than do the bulwarks of war. The Wolf Cub movement is an honest attempt on the part of its founder and its officers to give expression to these truths.

It is to be regretted that the world of today is saturated with a contempt of law. It matters not whether that law is civil or religious; whether enforced by home, school, church or state, the alarming tendency is to flout it. There is an overwhelming desire to be rid of every vestige of restraint and this has taken too firm a hold of our boys, as evidenced by the increasing prevalence of juvenile crimes. No country or community can afford to leave its childhood and youth without the sound lessons of subjection and control, for if those are omitted, the respect of right and disobedience to law are bound to develop. What will it avail any nation if its children grow up physically strong and mentally weak?

The average boy, if given a fair chance, is a law-respecter and enforcer rather than a law-breaker. The history of the Scout movement amply demonstrates this. The Wolf Cub

An Island Where Deer Are Safe

Listening to the Barking of Hounds on a Distant Island.

Taking an Apple from the Fingers of a Visitor

The deep music of a deerhound's voice came faintly down the wind; shortly it blended with the sharper voice of a hunting Airedale. The scream of a hungry cougar is not more terrifying to the timid deer of the British Columbia coast than the bay of the hounds on the trail. When they hear it they get up and go—straight for water.

The little spike buck, born a few seasons before on the rugged, forest-clad coast of the Pacific province, lifted his head. His eyes and his ears, his very pose, displayed the high tension of his taut nerves. He looked into the forest of the island on which he stood, and saw nothing alarming. He turned and stared across the water toward Nelson Island. The only thing that caught his eye that did not denote a restless nature, in primitive grandeur was a smudge of smoke that smeared the horizon and showed that a C.P.R. coasting steamer was out-bound from Powell River. Then the boom of the hound's voice rolled again across the waters from Nelson Island. The deer moved nervously, looked all

round again—and calmly bent his head to bite a mouthful of grass. He was safe. He was on Hardy Island. Hardy Island is the city of refuge to all the deer that know about it. Three years ago it was good hunting grounds. Today it is taboo to men with guns, and hell pops, as the saying goes, if men with both guns and dogs appear. It is unlawful to hunt deer with dogs in British Columbia, but it is still done in certain districts, in spite of law. Two years ago, or perhaps slightly more than that, Mr. C. J. Leyland, of England, purchased Hardy Island, a gem of land situated just off Nelson Island, at the mouth of Jervis Inlet. He bought it to experiment with British trees in the B.C. climate. There were 2,500 acres of rich lands and forests, and there was a good orchard. He placed a watchman, Tom Brazil, on the property, and did no more toward development, preferring to await the end of the war. Brazil, a lover of animals, caught two of the wild deer that frequently swam to the island from the other nearby lands. He tamed them. They in turn

brought other wild ones. Many of them had been run to water by dogs and took refuge on Hardy Island. There, seeing how intimate the original tame pair were with the man who controlled the orchards where the luscious apples grew, the wild newcomers gradually grew intimate, too. Today a herd of thirty deer, most of them born in wildness, respond to the voice of Tom Brazil when he calls. Some of them will step forward from the herd when called by name. They have no fear at all of man, when on Hardy Island. Sometimes they swim to other parts of the coast, and range about a bit, but they come back, often fagged from some fierce run and swim.

Tom Brazil's herd is becoming a by-word on the coast, but no dog and no man dare brave what might happen should he try to hunt on the island of refuge. So the deer are fat, are bringing new little lives into the world, and are adding to their numbers by recruit volunteers from the wild ranges where such safety is not known.—I. V. K.

Earlier Civilization Than That of Egypt

Interest in Benin, Africa, Scarcely to Be Surpassed

Archaeologists today think that Benin, Africa, may be a land where records of an earlier civilization than that of Egypt are to be found. But whatever the antiquity of Benin, its present day interest is scarcely to be surpassed.

Here are to be found a people so benighted that, until a quarter of a century ago, they put a taboo upon exportation of all their products except palm oil, and practiced human sacrifice to an appalling extent; yet so advanced that they knew the processes of weaving and the arts of carving and metal work long before the white man came.

Concerning an early attempt to Christianize the Benin there is told a story of tragic human appeal. Portuguese missionaries were working on the outskirts of the Benin country, which lies west of the Niger, in what now is the British protectorate of Southern Nigeria. The Ben monarch heard of their activities, and sent word that in exchange for one white wife he would enroll all his subjects in the Christian church. A member of the sisterhood volunteered to accept the hand of "this sable majesty," and he is said to have treated her most kindly, although her sacrifice wrought no appreciable change in the native religion.

The high cost of clothes bothers the Benin boy and girl not at all, for in token of allegiance to their king they wear none. When the king provides a youth with clothes he becomes a citizen, and usually with the bestowal of the clothes the king also bestows for him a wife, in token of his maturity. The man may choose as many additional wives as he wishes and can support.

Though polygamy is practiced almost universally, infidelity is punishable by death. Of the upper classes, one traveler said that he never had met with any black princes "so sensible and well-informed as these men,

who had so noble and commanding an appearance."

Most explorers have attested to the kindness and generosity of the natives, also to their light-fingered qualities, and all agree that to infringe upon their religious beliefs was a sure route to the sacrificial crosses where human crucifixion was practiced by the wholesale.

It was not until after a massacre of Europeans in 1897, when a British expedition was sent from Gwalto, the port city of the Benin country, to Benin City, twenty-five miles inland, that these fanatical sacrifices were eliminated.

The massacre occurred when seven unarmed British officials, on the way to Benin City, were set upon and murdered along with their two hundred native attendants. The punitive expedition captured the king and three of his chiefs. The latter were tried and condemned to death, the sentences of two being executed, while the third committed suicide. The king, also tried, was exiled. The trials took place in the native court house in the Benin capital.

Alfalfa Mill for Coaldale

Huge Alfalfa Yield in the Lethbridge and Coaldale Areas of Southern Alberta

One of the results of the huge alfalfa yield in the Lethbridge and Coaldale areas of Southern Alberta during the past season, and an indication of the confidence of the farmers there that this is merely a beginning of the yields of this fodder crop that will be produced, is made evident by the purchase by a local company of an alfalfa mill costing \$15,000.

This mill will bring the whole alfalfa plant into a meal, which, it is declared, has proven the most economical way to feed alfalfa. Alfalfa chop has been used in the past, but the new machine will turn out the actual meal. Its installation will mark the advent of a new and important industry in the development of the district.

What Belgium Has Done

The Most Intensively Cultivated Country in the World

The progress toward the restoration of pre-war conditions which Belgium has already accomplished is little less than marvelous. In less than a year her coal production—the basis of modern industry—reached 90 per cent; sugar refineries, 100 per cent; cotton looms, 60 per cent; wool products, 75 per cent, and shoes, 70 per cent. Even steel production, which suffered most, reached 30 per cent.

When Germany seized and carried away the machinery of Belgian factories, the confident expectation was to so crush out industrial production as to leave the Belgians reduced to agriculture. But the tide, which ebbed so fiercely has been flowing back, until of 9,797 machines of which a record was kept, there had, by the end of 1919, been returned 5,069 machines, and the remainder was still coming back at the rate of 30 carloads a day. During the war 1,366 miles of railroad track and 1,419 bridges were destroyed, and already these have been reconstructed.

We are accustomed to think of China and Japan as densely settled countries, but in 1913 Belgium was the most densely populated and intensively cultivated country in the world. Its 11,373 square miles make it about the size of Maryland, with one man in every six a land owner. To such perfection had agriculture been developed that three-fifths of the total area was under cultivation, producing an average of \$100 per acre—a record equaled by no other country. A 60-mile pipe line for pumping beet juice from 14 gathering stations to the sugar refineries illustrates the advanced development of its agricultural industries. In devastated farm lands Belgium was fortunate in losing only 70,000 acres—less than one per cent of its total area.

Freedom from general strikes and a national determination to restore normal exports, on which the country so largely depends, are hastening a return to prosperity; and wages have been materially increased, but are still low compared with other countries, as pre-war standards were maintained up to the time of the armistice. Instead of the spirit of extravagance which prevails in some other countries, the Belgians preserve that same national thrift which for so many years made it famous as affording the best living for the least money of any country maintaining modern conditions. Another year or two will almost restore pre-war production in most lines.—H. H. Windsor in Popular Mechanics Magazine.

Wealth From Waste

Production of Gas From Straw and the Briquetting of Lignite

A famous mustard maker used to remark that he owed his fortune not to mustard which people ate, but to what they left on the sides of their plates. That is one example of wealth derived from waste. But a correspondence has been good enough to draw our attention to other sources of wealth—to be derived from materials which would otherwise be wasted. Dr. R. D. McLaurin, who was until recently Professor of Chemistry in the University of Saskatchewan, has been particularly identified with research in the direction of the production of gas from straw and the briquetting of lignite. In terms of petrol, the gas from straw wasted annually in Western Canada would be 470,000,000 gallons, which is more than one-ninth of the total production of petrol in the world. Perhaps someone will apply Dr. McLaurin's calculations to South Africa. He has extended them to the United States, where he says that 200,000,000 tons of maize stalks are wasted annually. Could some Rhodesians run their agricultural machinery in whole or in part from the burning of their waste? It almost looks like it.—Bulawayo Chronicle.

"You know, old man, I was going to ask you to dinner with me tonight, but I just heard Smith remark that you were going to eat with him."

"Oh—what time do you eat?"

"Six o'clock."

"Well, that's all right, old boy. Smith doesn't eat till seven.—Judge."

Present Outlook For Prohibition

Certain Defects No Valid Ground On Which to Allege Failure

The present situation as regards provincial and federal prohibition calls for calm reflection on the precise facts. During the last few years most provinces have enacted laws based on the original Manitoba Liquor Law. This law was adopted as a basis because its essential features had been tested and approved by the privy council. The central object of that law was the abolition of the bar-room in any of its open or veiled forms. Provision of public facilities for drinking, especially for group consumption of intoxicants, was abolished. The slogan "Abolish the Bar."

That the enforcement of the various provincial acts did not stop all drinking of alcoholic beverages is no evidence of failure to do the thing which was attempted. These acts were adopted with the aid of thousands of citizens who temperamentally are prejudiced against any legislation which "closes a man's mouth."

The working of these acts has led to two results:

1. Citizens of conservative disposition are favorably disposed to consider more drastic restriction. Familiarity is lessening the horror with which they viewed the idea of prohibition. It is now impossible to evoke again the resolute hostility to effective prohibition which was experienced over large areas ten years ago.

2. Serious leaks have been recognized especially owing to the definite refusal of the acts to prohibit inter-provincial trade. But many who advocated the adoption of the acts did so with the avowed understanding that facilities were retained for those who desire to have liquor for domestic consumption would be allowed to import from beyond the province. In practice this allows the "short-circuit" arrangement by which orders may be sent to an agent outside the province, while in reality the liquor is sold and delivered by a firm in one's own neighborhood. Also grave difficulties have arisen regarding the prescription sale by druggists and physicians of beverages which could hardly be regarded as bona fide medical treatment. It must be noted that these defects while a valid ground of criticism of the acts if we assume that they aimed at preventing people obtaining liquor in their own homes, are no valid grounds on which to allege failure of the old acts.

The real question now before the people of the various provinces is two-fold. First, the better regulation of the sale by physicians and druggists, and second, the further regulation of the quantity of liquor to be allowed in one's own private cellar. The proposal to invade the cellar marks a definite advance beyond the previous acts and it is well that all our people should in taking this step, be fully aware of the new principle involved.

It is also most desirable that they recognize that the new federal law which may be used to prohibit inter-provincial import will only prohibit the actual importation of the liquor itself and will not in any way interfere with the "short-circuit" arrangement to which exception is now being taken. But it will go a long way to curtailing the amount available for distribution in some provinces where liquor is now manufactured, and thus will afford greatly improved protection against abuse.—Ernest Thomas.

Big Reclamation Plan

Manitoba and Saskatchewan will co-operate in the reclamation of the Carrot River triangle, lying in the vicinity of The Pas, according to government announcement. The estimated cost of reclaiming the land is \$2,000,000 and the cost will be borne by the two provinces in proportion to the amount of land in each. The triangle of 700,000 acres of land, 200,000 acres of which lie in Manitoba and the remainder in the adjoining province.

The raven is the first bird mentioned by name in the Bible.

MURINE Rests, Believes, Seethes, Boils—Keep your Eyes Strong and Healthy. If you are tired, smart, itchy, or burn, if sore, irritated, inflamed or Granulated, use Murine often. Safe for Infant or Adult. At all Druggists in Canada. Write for Free Eye Book. Murine Company, Chicago, U. S. A.

Princess Mary Contemplates A Tour

Something About the Most Popular Young Lady in the British Isles

It is announced that Princess Mary, only daughter of King George and Queen Mary, will shortly tour the chief European capitals. She is young enough and keen enough to take a schoolgirl's delight in the trip, for she shares that zest for enjoyment that made the Prince of Wales so easy to entertain when he visited Canada and the United States. Indeed, brother and sister are much alike, and an American correspondent said not long ago that just as certainly as the Prince is the most popular young man in the British Isles, the Princess is the most popular girl. She was a strenuous worker in the war. She was a Red Cross Nurse and throughout the struggle for three days a week she nursed wounded soldiers of Devonshire House. She is also an industrious and skilful needlewoman, and she and her friends at court made hundreds of garments of all kinds for the soldiers and the poor. These gifts were sent anonymously, for it was taken for granted that those for whom they were intended would not wear them if they were aware that royal hands had been employed in the making, but would be more likely to frame them as mural decorations.

It is commonly said that the Prince of Wales is much more like his grandfather than his father, and his sister appears to have inherited strongly from Queen Alexandra. But if Mary's hats are not the sort to delight fashionable milliners, her children all owe much to her sound common sense and her extremely practical mind. All of them are quite capable of earning a living. All have acquired habits of industry and that punctuality which is called the courtesy of princes, and it is the queen's own views are in some cases what might be called Victorian, the prince and princess have been brought up in conformity to the democratic spirit of the day. It is not unlikely that some time the princess may pay a visit to this country. If so, it is certain that she will have as affectionate a welcome, if not so strenuous, as that bestowed upon her brothers—Manitoba Free Press.

Y.M.C.A. in Mesopotamia

Work Has Been of Great Benefit and Is More Needed Now

London, England.—The general in command at Baghdad has cabled to the Y. M. C. A. in London asking that Y. M. C. A. workers in Mesopotamia, who, on account of the financial difficulties of the association, were under orders to be ready to close down at a week's notice, should be instructed to carry on for another year. He points out the value of the Y. M. C. A. to British soldiers living among the social conditions of an Asiatic country, with only a very small British settlement, while those in the deserts and outposts were removed from any kind of civilization whatever. "During the period of reorganization of the army of occupation," the message continues, "and until social conditions improve, it is of great importance that the association continue its program for another year. Glad if you will reconsider decision, as work of this association has been of great benefit and is even more needed now than heretofore, with the advent of new regiments with young soldiers."

The Sublime Porte

Lord Cecil gives as his opinion that it is not necessary to expel the Turkish people from Constantinople, even the sultan might remain, but the Sublime Porte, associated with the worst intrigues and crimes in history, breeding ground of international disputes, must be got rid of. The Sublime Porte is then the government of Turkey. The term is French for Porta Sublimis, the lofty gate. Constantinople has twelve gates, near one of which is a building with a lofty gate, called Ali Bab, in which resides the grand vizier, and where are situated all the offices of the chief ministers of state, and from which issue all imperial edicts. The French term, Sublime Porte, recalls the time when French was the diplomatic language of Europe.

More than 600,000 women in the United States are employed as clerks.

SHORT OF BREATH Could Hardly Walk Without Resting.

When you go to a physician to be examined for any heart trouble, one of the first questions he asks is: "Are you short of breath?"

Now, when the heart becomes affected there ensues a feeling of a choking sensation, a shortness of breath, palpitation, throbbing, irregular beating, smothering sensation, dizziness and a weak, sinking, all-gone feeling of oppression and anxiety.

On the first sign of the heart becoming weakened or the nerves unstrung Milburn's Heart and Nerve Pills are just the remedy you require. They regulate and stimulate the heart, and strengthen and restore the whole nerve system.

Mr. Stephen Crouse, East Clifford, N.S., writes: "I suffered for five years with heart trouble. I could hardly walk from the house to the barn without resting, as I used to get so short of breath. Doctors could not help me. My wife told me to get a box of Milburn's Heart and Nerve Pills and I felt better after taking them; three boxes made me quite well. I am now helping my son to work the farm, and can truthfully say I feel like a different man."

Write 50c a box at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Valuable Mining Property

The Greatest Yielding Copper Mine On the Continent

The sale of the Flin Flon copper mine of La Pas in southern Manitoba to the International Nickel Company has just been announced. The purchase price was one million dollars.

Consequent on this purchase it is expected that a railway to the mine will be built in the near future, connecting with the Hudson's Bay Railway at a point about 42 mile north-east of the Pas and that a smelter will be built and water power which is located near the mine will be developed.

The proven ore body in the mine is twenty million tons, worth about 180 million dollars, which will make it the greatest yielding copper mine on the continent, states the Regina Post.

Hard

"You've got a head like a row of piano keys."
"Why so?"
"Solid ivory."

DANDERINE PUTS BEAUTY IN HAIR

Girls! A mass of long, thick, gleamy tresses

Let "Danderine" save your hair and double its beauty. You can have lots of long, thick, strong, lustrous hair. Don't let it stay lifeless, thin, scraggly or fading. Bring back its color, vigor and vitality.

Get a 35-cent bottle of delightful "Danderine" at any drug or toilet counter to freshen your scalp; check dandruff and falling hair. Your hair needs this stimulating tonic; then its life, color, brightness and abundance will return—Hurry!

The man who has nothing to say isn't always conscious of it until after he has tried to say it.

German Dyes for Great Britain

First Installment Will Shortly Arrive In Great Britain

The British Board of Trade has just given notice to consumers of dyestuffs that the first instalment of colors which Germany has to furnish under the reparations clauses of the peace treaty will shortly arrive in the United Kingdom, and will be followed at intervals with additional quantities. Distribution will be made as soon as possible after each consignment is received. The basis for distribution will be normal probable requirements for the next six months of the members of Color Users' Association and the National Federation of Paint, Color and Varnish Manufacturers.

Unusual Game Shortage

Natives of the Arctic Red River region are facing starvation because of the shortage of big game this winter, according to members of the Royal Canadian Mounted Police expedition to Herschel Island and Fort McPherson on the Arctic coast who arrived at Dawson recently. Not even enough skins were available to supply the natives with moccasins, they reported. Relief supplies have been sent to Fort McPherson.

GET SLOAN'S FOR YOUR PAIN RELIEF

You don't have to rub it in to get quick, comforting relief

Once you've tried it on that stiff joint, sore muscle, sciatic pain, rheumatic twinge, lame back, you'll find a warm, soothing relief you never thought a liniment could produce.

Won't stain the skin, leaves no muss, wastes no time in applying, sure to give quick results. A large bottle means economy. Your own or any other druggist has it. Get it today. 35c, 70c, \$1.40. Made in Canada.

U.S. Would Remove Turks From Europe

Washington.—The original position of the United States government, that the Turks should be expelled from Europe is restated in a note to the allied supreme council, which has been prepared at the state department, and which will be transmitted soon.

The communication is in reply to an enquiry from the French and British governments as to the views of the United States on the Turkish settlement. The position of the United States government is understood to be that there is no sound reason for retaining the Turkish capital in Europe. The United States is said to take the view that the contention that the expulsion of the Turks might be resented by the Mohammedans is not supported by the facts since the war in the near east was won largely by the aid of Mohammedans.

The United States, it is understood, desire that Armenia be set up as an independent state and that it embrace as much territory as the Armenian government can control. It also takes the position that any arrangement that is made with regard to Turkey should guarantee to all nations equal opportunities for commerce and that no belligerent should be given paramount claims in any part of the near East.

The position of the United States, it is said is also that in any arrangement for the government of Constantinople and the Turkish states, a place for the participation of Russia should be made, as the United States government is convinced that no plan of settlement can be successful in the long run which does not take into account the interest of Russia in the matter.

To Restore Order

Ally to Allow Despatch of Ebert Forces Into Ruhr Valley Districts

Paris.—Two German officers, who have arrived here from Berlin to explain to the allies the necessity for permitting the German army to enter the occupied zone to restore order, saw Premier Millerand and told him the Ebert government had ample forces ready to deal with the situation in the Ruhr valley. It is understood on good authority the allies have decided to give the permission. The French government would have preferred inter-allied action in the occupied zone, while the British and Italians favored granting permission for operations by the Germans. The French gave way on this point in view of the dependence of France on supplies of coal from the Ruhr district.

French coal production has decreased from the old figure of 40,000,000 tons to an average of about 18,000,000 tons yearly. By the terms of the treaty of Versailles Germany is bound to cover the deficiency up to a total of 20,000,000 a year. On the restoration of order in the Ruhr valley, therefore, depends largely the continuation of French industries.

Withdraw Chinese Troops in Siberia
Peking.—The government has ordered the withdrawal of Chinese troops from Siberia. This important action is taken as indicating an accord with the powers relative to Russia, and also as tantamount to abrogating the Chino-Japanese military convention which provided for common action in case of invasion across the northern frontier.

Reprisals Threatened in Ireland
Queenstown.—The chairman of the district council has received a type-written communication warning him that he will be assassinated in the event of the shooting of any Queenstown policemen.

Mrs. Humphrey Ward Dead
London.—Mrs. Humphrey Ward, the novelist, died of heart disease in a London hospital on Wednesday.

Will Keep Down Lumber Prices

Manufacturers Will Do Everything Possible to Prevent Any New Advance

Calgary.—That there will be no further increase in the price of lumber if the manufacturer can possibly help it, was the statement of I. R. Poole, secretary of the Mountain Lumberman's Association, today. Mr. Poole said that this decision had been arrived at notwithstanding the increased cost of production.

"If the manufacturers can control the situation the price of lumber will certainly not further advance," he definitely stated. Another matter which occupied considerable time of the convention was the gathering together of facts for presentation to the Canadian Board of Commerce, covering 1919 operations. These will be presented to the board in due course. Mr. Poole stated that these figures will prove conclusively that the manufacturers were not in the "profiteering" class.

Urges Energetic Steps To Enforce Treaty

Andre Tardieu Says France Has Been Left Burden

Paris.—An immediate meeting of allied leaders to decide upon energetic steps to insure enforcement of the treaty of Versailles was urged by Andre Tardieu, former commissioner of Franco-American relations, in an interview here.

"The treaty already appears to have been violated as much as any treaty could be," Tardieu said. "It is urged that the allied governments meet to decide upon immediate drastic steps."

Tardieu believed the difficulties in allied-German relations will continue to increase rapidly, until the allies decide upon immediate drastic steps, "at once and enforce it firmly. Enforcement of the treaty practically has been left to France, Tardieu said, and France's position is probably weakened by the movement of the peace conference to London. The recent "intermittent meetings" of the congress have been characterized neither by firmness "nor unity of direction," Tardieu believed.

Daniels Again Criticised

Statement That U.S. Navy Department Was in State of Chaos When War Was Declared

Washington.—Not only was the navy department without comprehensive plans for naval participation in a war when the United States severed relations with Germany, but Secretary Daniels disapproved the general plan drawn up by the bureau of operations and submitted in March, 1917, Chairman Harris Laning, former assistant chief of navigation told the senate investigating committee.

As a result of this alleged lack of preparation, the witness said, the navy department was virtually in a state of chaos the day the United States entered the war.

Personal characteristics of Secretary Daniels often made it impossible to obtain approval of important plans and policies, Chairman Laning asserted, as the personal interest taken by him in minor affairs "occupied so much time that he never had much left to give us for really important problems."

Chairman Laning, at the time war was declared, said there was not a sufficient reserve.

Amersfoort.—For the first time since the Kapp revolution, former Emperor William was permitted to leave Bentinck castle here. Guarded by two police officers he made a secret trip to Doorn in a closed automobile. His object was to view the progress of the work on his future residence at Doorn.

Lemieux Speaks On Bi-Lingual Question

Says Exclusiveness Is Not A Policy, But A Blunder

London.—The King today received the Hon. Rodolphe and Mrs. Lemieux, and handed them the military cross won by their son. Mr. Lemieux was later entertained by the Empire Parliamentary Association at Westminster, Sir Auckland Geddes presiding at the function. Mr. Lemieux spoke at length on the bi-lingual question, and said in part: "I am not speaking as a party man but as a Canadian who gave his all for the cause of small nationalities. From Sir Wilfrid Laurier I learned isolation and exclusiveness is not a policy, but a blunder."

The gathering was largely attended by members of the house of commons and the house of lords, acceptances including ex-premier Asquith, the Duke of Devonshire, Archbishop of Canterbury, Lord Bournemouth, Lord Islington, and Hon. Walter Long. General Seeley and Ben Tillett were also present.

France May Retaliate

Further Decline in Franc Value Provoked Fresh Discussions

Paris.—Sharp declines in the value of the franc as compared with American dollar and the British pound sterling, while the German mark, despite disorders in the Ruhr district, made a substantial gain, have provoked the fresh discussion of the exchange situation and the renewal of talk of rigid restrictions on importations as a measure to check the depreciation of the franc. Financial authorities are of the opinion that restrictions afford the only immediate remedy and predict an early prohibition of all luxuries and articles which might be described as superfluous.

New Home For Former Crown Prince

Said to Have Declined Residence Near Exiled Father

The Hague.—Announcement by the premier today that the Dutch government had granted the island of Weiringen to the former German crown prince as a place of residence is believed here to complete the steps by which Holland seeks to meet allied demands as to the safe keeping of former Emperor William and his son. Reports are current that the crown prince asked that his residence be fixed on the island, and declined an opportunity to live near his father.

French Peace Loan

Paris.—Unofficial figures of the amount subscribed to the peace loan places the total at between 15,000,000 and 16,000,000 francs. There is a larger proportion of currency than in the former loans.

Soviets Are Still Active In German Revolt

Thoroughbreds From Royal Windsor Stable

Prince of Wales May Have Horses On Western Tracks at Summer Fairs

Saskatoon.—The Prince of Wales' thoroughbred race horses from Windsor stables, England, will probably be seen on the western Canadian race tracks during the big summer fairs this year.

J. Carlyle, manager of the Alberta ranch, which His Royal Highness purchased on his Canadian tour last summer, has gone east to superintend the unloading of the horses, which are expected to arrive from the old country in May or June.

The string now numbers seven thoroughbred animals, most of them two years old. They are of the purest English stock, and while they are being sent to Canada, primarily for breeding purposes it is anticipated some of them will be raced around the western Canada fair circuits this year.

Are Not All Soviets

Many Germans Are Fighting Against Government for Anti-Monarchist Movement

London.—Not all of the workmen who have taken up arms against the government in Germany are imbued with Spartan ideas, according to office today. Information gathered by British representatives in Germany show many workmen intend to fight until certain anti-monarchistic representatives are included in the new cabinet. The Essen disturbances, which are the most serious in the country, are described, however, as purely Bolshevik.

The indications were, it is said, that the peace conference is gradually coming round to the British idea that the Germans should be left to settle their own internal troubles while the peace treaty is not violated.

To Banish Horses

Denver.—Denver is to banish the horse from her streets if a bill now before the city council becomes a law. No horses, cattle, sheep or swine may after January 1, 1925, be kept in the city limits or driven on the streets.

Turk Leader Is Arrested

Constantinople.—Ali Said Pasha, military governor of Constantinople, has been arrested by the British forces in that city.

Leipzig.—Halle, the large industrial town just to the northwest of this city, is completely cut off from communication. Latest reports were that the troops had gained the upper hand after a considerable part of the city had been reduced to ruins.

Saxon troops to reinforce the government's contingent in Halle, are on the way there. In other nearby communities the turmoil terminated which had been existing for more than a week. As far as can be learned the workmen's revolt in this section is directed against the military elements and shows no Bolshevik tendencies. The single exception is the town of Falkenstein, southern Saxony, where a soviet is said to have been established by Communist leaders.

Both wings of the Socialist-Democrats are demanding the reservations of martial law and the withdrawal of the troops. These are among the workmen's principal demands.

In Leipzig the stone walls of the great railway station of the Volkshaus and dozens of buildings are pitted from top to bottom from machine gun and rifle fire, while hand grenades have left many ugly gouges. The normal life of the city is being revived, but the stranger instantly detects a feeling of excitement and expectancy.

It is estimated that there are less than 1,000 Communists in Leipzig, although the Independent Socialists are very strong.

According to conservative estimates about 10,000 carried arms in Leipzig last week, and beginning with the first clash, March 15, when 17 persons were killed and 60 wounded, there was almost constant street fighting up to last Saturday.

Essen Is Now Normal

Soviet Government Leader Says He Does Not Fear Intervention From Allies

Amsterdam.—Conditions at Essen present a normal outward appearance except for the presence of armed laborer guards, red flags, armored automobiles and a few bullet marks on the buildings, according to the correspondent of the Telegraf who arrived at Dusseldorf. A member of the soviet government at Essen told the correspondent he had no fear of allied intervention so long as the allied missions were safe.

The correspondent found the soviet administration proclaiming the necessity of returning to work and admonishing against plundering.

NOTICE

Next Monday, the 5th; being Easter Monday, the
BANK WILL BE CLOSED

The Church and Its' Work By The Rev. W. S. Wickenden Good Friday—The Cross of Christ,

Except from the Cross of Christ there is no answer to the supreme need of the awakened sinner. That need is to get right with God by getting rid of sin. How can guilty sinners have access to the Eternal Holy God? They cannot any more than a justly condemned criminal has access to liberty. But through the Lord Jesus Christ, "God manifest in the flesh" taking the sinner's place on the first Good Friday and suffering the penalty instead, there is now forgiveness, and access even into the holiest—into Heaven itself for every seeking soul. And all seekers, in God's time, experience this great salvation and such comprise the Church of Christ.

From heaven He came and sought her
To be His Holy Bride
With His own Blood He bought her
And for her life He died.

Geo. Butcher claims to have solved the High cost of Living problem in this way. He invited the U. F. W. A. to his shack for a meeting, and added sotto voce, "Please bring pie, cake, or anything else to eat with you."

FARMERS BREED PERCHERONS

The only breed of draft horses ever shipped back to England from Canada for breeding purposes were Percherons. The greatest breed of draft horses in North America are Percherons. The safest investment in draft horses today is Percherons. A profit to own—A pleasure to handle. You will make no mistake in your horse breeding this year if you use a Percheron sire.

WRITE FOR INFORMATION AND LITERATURE
Let us put you in touch with the best Canadian Percheron Breeders. Mention this paper when writing.

Storm Loss of Ten Millions

Officials of the Nova Scotia Highway Board today stated that the damage to the bridges in Annapolis county during the recent floods will be at least ten million dollars and that it will be months before vehicle traffic across the Annapolis and Lequille rivers can be resumed. Four steel bridges, two wooden bridges, and at least a dozen smaller ones were demolished to a greater or less degree.

**And His Family Medicines**

MOST people first knew Dr. Chase through his Receipt Book. Its reliability and usefulness made him friends everywhere.

When he put his Nerve Food, Kidney-Liver Pills and other medicines on the market they received a hearty welcome, and their exceptional merit has kept them high in the public esteem.

Take Dr. Chase's Kidney-Liver Pills for example. There is no treatment to be compared to them as a means of regulating the liver, kidneys and bowels and curing constipation, biliousness, kidney disease and indigestion.

One pill a dose, 50¢ a box at all dealers, or Edmundson, Bates & Co., Ltd., Toronto.

Dr. Chase's Kidney-Liver Pills

New Star Discovered

Discovery of a new star, the sixth in the constellation of Sagittarius, was announced by the Harvard College observatory recently. The Nova was found by Miss Woods of the observatory staff on photo plates taken in 1905. It does not appear on recent plates.

He Says They Are Surely the Best

FRANK HANNON SWEARS BY DODD'S KIDNEY PILLS

States that they cured his backache after other medicines had failed and that he would not be without them. Corcoran, Joliette Co., Que., March 28.—(Special).—Claiming that he is completely cured of backache from which he was a severe sufferer, Mr. Frank Hannon, a well-known resident here, is shouting the praises of Dodd's Kidney Pills.

"After trying various medicines for my backache," Mr. Hannon states, "I finally bought a supply of Dodd's Kidney Pills. From the start of the treatment I felt benefited and now I am completely cured."

"I therefore proclaim Dodd's Kidney Pills the finest on the market. I would not be without them." Dodd's Kidney Pills strike right at the seat of the trouble, the kidneys. They are no cure-all. They are simply and purely a kidney remedy. But as cured kidneys strain all the impurities, all the seeds of disease, out of the blood, Dodd's Kidney Pills naturally bring about curing a number of different diseases.

Ask your neighbors about Dodd's Kidney Pills.

Women's Institutes In Alberta

Increased During the Past Year By More Than Three Thousand

The steadily increasing influence and importance in the life of the province of the Women's Institutes in Alberta was demonstrated at their first annual convention held at Edmonton.

In the course of the convention the superintendent made the statement that the membership of these institutes had increased during the past year by more than three thousand, making a total of 13,150 members in the province and giving Alberta the second largest institute in Canada.

An immense amount of work has been done by these institutes, especially in the rural settlements, where their effect is particularly beneficial. The curriculum includes lectures and demonstrations in dozens of different lines; there were fifty-four short courses of instruction in home nursing, care of the sick, and first aid, which were delivered by the provincial health nurses of the department of health. Twenty-one demonstrations were given. Sixteen short courses in cookery, and numberless other demonstrations and lectures in rural sociology, legal status of women, civics, improved schools, the feeding and health of children, etc. In addition to this, an immense amount of relief work has been carried on and thousands of dollars raised throughout the province, distributed for this purpose.

Health is real wealth.

Minard's Liniment for sale everywhere.

Breeding Draft Horses

Demand for Heavy Draft Animals Was Never Better

From reports received from every part of the country it is apparent that there are fewer good draft colts from one to three years of age than ever before. The country is overstocked with light nondescript colts and horses for which there is no demand and for which there is not likely to be any great demand in the future. The world is short of heavy draft animals, and the outlook for good prices for this class of stock weighing from 1,650 to 2,000 lbs. at maturity, was never better. France alone of the European countries is in the market for 60,000 heavy draft horses, for which they will pay good prices.

Farmers and breeders should not fail to breed every good draft mare available this year, and they should be bred to the biggest draft stallion available. Breed is not so important as size, quality, and weight. The breeds that produce these desirable qualities with greatest uniformity may be listed in the following order: Percherons, Belgians, and Clydesdales. Breeders desirous of purchasing good sires should select not only good individual stallions, but they should select to it that they are bred from good families of mares, and if possible should purchase Canadian western bred horses, that have been acclimated. The curse of the heavy horse breeding industry in Western Canada has been the importations and sale of cheap fat stallions of poor ancestry. Farmers should breed only from the draft horses of the future.—By Prof. W. L. Carlyle.

100% PEP!

If Constipated, Bilious or Headachy, take "Cascarets."

Feel bilious? Be efficient! Don't stay sick, bilious, headachy, constipated. Remove the liver and bowel poison which is keeping your head dizzy, your tongue coated, your breath foul, and stomach sour. Why not spend a few cents for a box of Cascarets and enjoy the nicest, gentlest, laxative, cathartic you ever experienced? Cascarets never gripe, sicken or inconvenience one like Salts, Oil, Calomel or harsh Pills. They work while you sleep.

Bricks made from peat are being used in Sweden for small buildings.

Intelligence of Horses
Wantmore Peanut Cookies

A Pony That is Credited With the Best of Table Manners

The high intelligence of horses was superbly demonstrated during the war and some day a lover of the horse will collate the many wonderful incidents in which he played a leading part. One of these will be the vagaries of a Canadian General's thoroughbred, which again and again refused to budge to the spur at times when there was apparently no evidence of the slightest danger. Twice he saved his master's life by deliberate acts of insubordination. The latest yarn about a pony that had a race-track reputation is worth repeating in this connection. Every morning his owner brought this pony into the dining-room of the house in which he was billeted, and led him round the table. The pony was offered all sorts of dainties, but he would only touch slices of bread and butter, of which he was inordinately fond. It was not a big room, and there was not much space between the wall and the table, so if he had shown any restlessness the table and all that was on it must have been demolished. He, however, behaved always with the manners of a retriever dog, and only the slices of bread and butter had to be replenished.

Minard's Liniment Cures Burns, Etc.

Do Not Question U.S. Action

Colonel Malone asked the Government in the British House of Commons whether the supplying of arms and ammunition to Poland by the United States government had received the approval of the supreme council. Andrew Bonar Law replied that any action which the United States may have seen fit to take in this matter could not suitably be the subject of question and answer in the house.

One-fourth cup butter (scant), one-half cup sugar, one egg beaten without separating white and yolk, one cup Fowler's Wantmore Blended Salted Peanuts, two tablespoons of milk, three-fourths cup of flour.

Create the butter gradually, beating in the sugar, egg, milk and flour sifted with one teaspoonful of baking powder. Chop the nuts fine and add them to the mixture. Drop on a buttered tin a teaspoonful on one place; bake in a moderate oven. This recipe makes two dozen small cakes. Be sure and use Fowler's Wantmore Salted Peanuts, as no other peanuts make them as good.

A Health Saving Reminder.

ed the approval of the supreme council. Andrew Bonar Law replied that any action which the United States may have seen fit to take in this matter could not suitably be the subject of question and answer in the house.

A woman can get a man to do anything she wants him to if she has tact enough to induce him to talk about himself.

**A Happy Family**

BY DR. S. C. BOWERS.

A happy family is one that can sit down to the table with keen appetites and good cheer. Plenty of the out-of-doors and cleanliness, inside and outside of the body, will make for health, wealth and happiness. Your doctor will tell you that anything from a headache to the most serious illness may result from allowing food to ferment in the intestines. The first thing to do in case you feel mean, logy, dull, perhaps feverish, is to flush the liver and kidneys; drink plenty of water, and take a dose of castor oil, or, something better, made of May-apple, aloin and jalap, and long sold by almost every druggist as Dr. Pierce's Pleasant Pellets. This may save you from a fit of sickness, remove the poisons from the system and give the tissues of the body a chance to build up and resist disease.

People are realizing more and more that the kidneys, just as do the bowels, need to be flushed occasionally. The kidneys are an eliminative organ and are constantly working, separating the poisons from the blood. Uric acid backs up into the system, causing rheumatism, neuralgia, dropsy and many other serious disturbances.

This can be avoided by stimulating the kidneys to increased action, and because of its tonic effect on these organs I would advise any one to get Anurie (anti-uric-acid) which is to be had nowadays for fifty cents, at almost any drug store.
